**Permobil Inc.**

**Mission:**
“Every person with a disability has the right to have his or her needs compensated as far as possible by aids with the same technical standard as those we all use in our everyday lives.

**Permobil Background:**
“Permobil founder Dr. Per Uddén believed that helping people achieve the greatest level of independence is a basic human right and, for over 50 years, Permobil has held fast to that belief. Permobil is a global leader in advanced rehabilitation technology, passionate about better understanding our users’ needs and improving their quality of life. Today, those solutions include power wheelchairs, seating and positioning products, power assist, and manual wheelchairs.”

**Capstone Goals**
- Work with clinicians to gain knowledge about children with PM needs through interviews and surveys.
- Contribute to literature analysis to Delphi Study for Explorer Mini.
- Collaborate with peers to coalesce research findings.
- Contribute to a research study on clinician perspectives of the Explorer Mini.
- Develop educational materials for clinicians and caregivers regarding the Explorer Mini.

**Explorer Mini/ Pediatric Power Mobility**
The Explorer Mini is a Food and Drug Administration (FDA) cleared, class II medical device designed with the aim of bridging the gap between mobility and developmental milestones for children 12-36 months of age. (Permobil, 2020)

**Abstract:**
**Aim:** The purpose of this study was to examine how clinicians perceived the use of the Permobil Explorer Mini with children ages 12-36 months.

**Methods:** This study utilized a mixed-methods approach using pre- and post-surveys and interviews. Ten clinicians currently using the Explorer Mini completed the pre-survey. Of the 10 participants, 6 agreed to participate in an interview conducted via Zoom®. Six weeks after the pre-survey was sent out, all participants were asked to complete the post-survey. Of the initial 10, 7 participants completed the post-survey.

**Results:** Thematic and frequency analysis revealed 4 themes: 1) Perspectives on Clinical Reasoning 2) Perspectives on Frequency and Dosage 3) Perspectives on Environmental Exploration 4) Perspectives on Goals and Outcomes.

**Conclusion:** All participants indicated that they recommend the Explorer Mini for mobility and environmental exploration. Discrepancies remain regarding the dosage and frequency of the device and the appropriate age of implementation. Most clinicians determine readiness for the device using their clinical reasoning, rather than age or assessment tool.

**Professional Development**
- Facilitated virtual interviews with clinicians to learn more about their perspectives on the Explorer Mini.
- Provided mentorship to second year students completing their research project.
- Completed International Society of Wheelchair Professionals Basic Level Certification.
- Attended 3 webinars to learn more about the Explorer Mini.

**Acknowledgements**
- Thank you to my expert mentor, Jennith Bernstein, for your guidance, knowledge and for taking the time to lead us through this experience. Thank you for always being there for us and for your unwavering support.
- Thank you to my faculty mentor, Dr. Teresa Plummer, for sharing your knowledge and passion with us. Thank you for inspiring us and leading us each step of the way. I greatly appreciate all of your support and encouragement.
- Thank you to Karin Leire, Ann-Marie Engdahl, and everyone at Permobil for sharing your knowledge and experiences with us, and for taking the time to assist us with our project.
- Thank you to Dr. Mary Dietrich for your time, diligence and patience when helping us analyze data.
