What level of influence do the actions and rhetoric of governors have on constituents' response to vaccination? In this paper, I analyze how the rhetoric of governors and their efforts to combat the coronavirus pandemic has influenced the progression of coronavirus vaccination amongst their constituents. If governors take significant statewide steps and mitigation measures to combat coronavirus and vigorously enforce and advocate for vaccines, those who are of the same political party will become more opinionated in favor of vaccination, and those of opposite parties will become more resistant to vaccination.
